

# Patient Map

The Mind Map is the ideal way to present clinical data:

Clear, simple, uncluttered interface

Discoverable

Unlimited potential to drill down on details and supplementary information

# Simple, uncluttered interface

# Discoverable

## Active Concerns

### Problem #1

Pneumonia (onset July 3, 2013; resolution Aug 14, 2013) [authored Aug 14, 2013]

### Problem #2

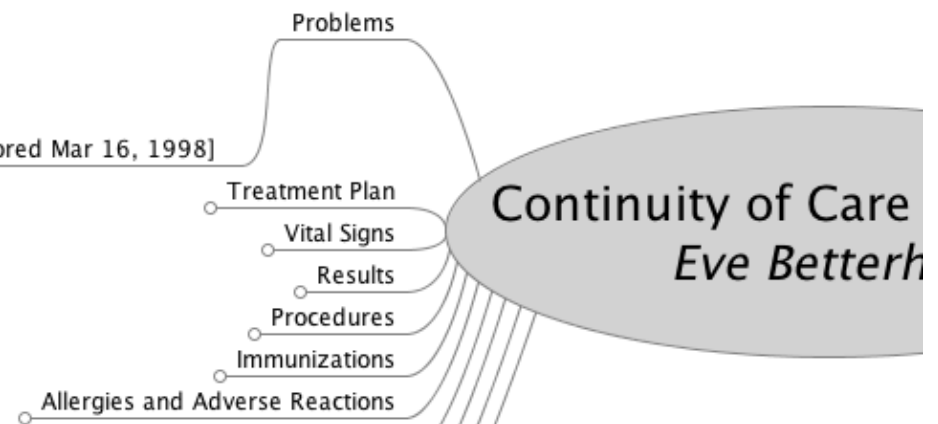

Chest pain (onset Apr 14, 2007) [authored Apr 14, 2007]

Angina (onset Apr 17, 2007) [authored Apr 17, 2007]

## Resolved Concerns

### Problem #3

Pneumonia – Left lower lobe (onset Mar 10, 1998; resolution Mar 16, 1998) [authored Mar 16, 1998]

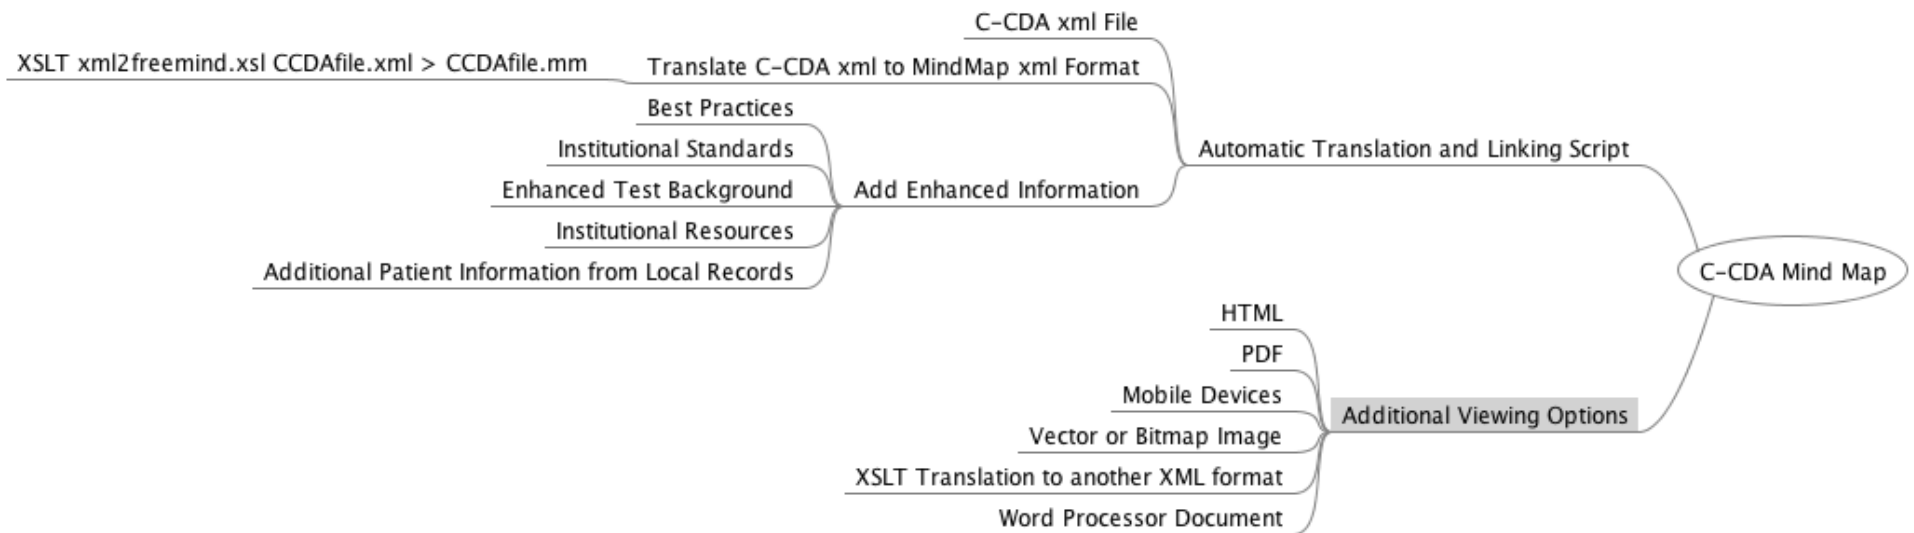

# Customize with Local Information

- Institutions and individual practices can customize the XSLT template with links to local guidelines or sources of additional information

# Patient Map

- Takes advantage of CCDA XML format
- Easy to customize XSLT for local preferences
- Viewable on all devices and formats with Mind Map, HTML, PDF and Document options
- All Open Source Software and Protocols
-
